Enhancing Data Security in Five Weeks: An Add-On Certificate Program" is a specialized educational program aimed at providing participants with advanced knowledge and practical skills in the field of data security. The program is designed to be completed in five weeks and focuses on critical aspects of data security, including encryption, access control, compliance, network security, and incident response.

DATA SECURITY COURSE OBJECTIVES

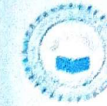

- Build a foundational understanding of data security principles.
- Master data encryption techniques for data protection.
- Implement access control and authentication methods.
- Ensure compliance with data privacy regulations.
- Apply network security measures for data transmission.
- Adopt industry best practices for data security.

COURSE OUTCOME

- Deep understanding of data security importance and risks.
- Proficiency in data encryption techniques.
- Mastery of access control and authentication methods.
- Compliance knowledge for data privacy regulations.
- Competence in network security measures.
- Adherence to security best practices.
- Cloud security strategy expertise.
- Skills in security auditing and monitoring.
- Awareness of secure software development.

TABLE OF CONTENTS OUTLINE

- Introduction to Data Security
- Data Encryption
- Access Control and Authentication
- Data Privacy and Compliance
- Network Security
- Security Best Practices
- Securing Cloud Environments
- Security Auditing and Monitoring
- Secure Software Development
- Data Security in Emerging Technologies
- Incident Response and Recovery
- Security Awareness and Training
- Capstone Project

Report on ADD-ON PROGRAM ON ENHANCING DATA SECURITY IN FIVE WEEKS

Duration: 05-07-2019 to 10-08-2019

The Add-On Program for enhancing data security is a comprehensive initiative designed to address the growing concerns surrounding data protection. The program aims to equip participants with the necessary skills and knowledge to implement effective security measures in their respective domains.

Program Overview:

The program spans five weeks and covers a range of topics crucial to data security, including encryption techniques, threat detection, access control, and incident response. Each week is dedicated to a specific aspect of data security, building a solid foundation for participants.

Duration: Five weeks

Objective:

The primary objective of the program is to empower participants with the tools and knowledge needed to enhance data security within their organizations. By the end of the program, participants should be able to implement robust security measures, identify potential threats, and respond effectively to security incidents.

Target Audience:

The program is tailored for professionals across various industries, including IT specialists, data analysts, system administrators, and anyone responsible for handling sensitive information. It is suitable for both beginners looking to grasp fundamental concepts and experienced individuals seeking advanced insights into the latest security practices.

Number of Students Attended: 137

Details of the Resource Person: 1) Mrs.T.Aruna,

Assistant Professor,

CSE Department,

Dr.Lankapalli Bullayya College of Engineering for Women.

2) Dr.G.Vamsi Krishna,

Sr. Assistant Professor,

CSE Department,

Dr.Lankapalli Bullayya College of Engineering for Women.

E-mail : lbcenggprincipal@gmail.com Website : www.bullayyacollege.info

Methodology:

The program adopts a blended learning approach, combining theoretical sessions, hands-on workshops, and case studies. Participants will engage in practical exercises to reinforce their understanding of security protocols and utilize industry-standard tools for simulation exercises.

Outcome:

At the conclusion of the program, participants will have a heightened understanding of data security principles, improved proficiency in implementing security measures, and the ability to analyze and respond to potential security threats effectively. Additionally, participants will receive a certification to validate their newly acquired skills.

Conclusion:

The Add-On Program on enhancing data security in five weeks is a strategic initiative to address the critical need for skilled professionals in the field of data security. By providing a comprehensive and practical curriculum, the program aims to contribute to a safer digital environment for organizations and individuals alike.

ABOUT THE ECE DEPARTMENT

The Department of Electronics and Communication Engineering was established in the year 2010 with an annual intake of 120 students for B.Tech Program. The Department has a mix of both experienced and young faculty. All the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge.

ABOUT THE COURSE

In pursuit of technical education, the department of Electronics and Communication Engineering of Dr. Lankapalli Bullayya College of Engineering have organized the ADD-ON Course on "TWO WEEK ADD-ON PROGRAM ON DIGITAL and ANALOG VLSI DESIGN" from 08-07-2019 to 20-07-2019, with an objective to develop students practical knowledge with respect to VLSI design. This workshop is organized to provide additional knowledge to the students in addition to the regular curriculum.

Introduction

Very Large-Scale Integration (VLSI) design is at the heart of modern semiconductor technology. It encompasses the design and creation of complex digital and analog integrated circuits on a single chip. The convergence of digital and analog VLSI design has become increasingly essential as modern electronic devices require both the precision of analog circuits and the computational power of digital logic. In this exploration, we delve into the world of VLSI design, looking at the key concepts, challenges, and the vital role it plays in our technological landscape.

Understanding VLSI Design

VLSI design involves the integration of a large number of transistors and other electronic components onto a single semiconductor chip. This process enables the creation of high-performance and energy-efficient electronic systems, ranging from microprocessors and memory chips to sensors, communication devices, and custom application-specific integrated circuits (ASICs).

There are two main categories of VLSI design: digital and analog.

Digital VLSI Design: Digital VLSI design focuses on the development of digital integrated circuits, where information is represented in discrete values, typically as binary signals (0s and 1s). This category includes digital processors, memory units, and controllers. Digital circuits are known for their logical operations, which are highly reproducible and less prone to noise and interference.

Analog VLSI Design: Analog VLSI design involves the creation of analog integrated circuits to process continuous signals, such as audio, video, and real-world sensor data. These circuits are vital for applications like audio amplification, analog-to-digital and digital-to-analog conversion, and signal conditioning. Analog circuits require a deep understanding of electronic principles and are designed to perform accurate, real-time processing.

Digital and Analog Interplay

In many electronic systems, digital and analog components work together to provide the necessary functionality. For instance, in a smartphone, digital processors handle data processing, while analog components, such as the microphone, convert sound into electrical signals. This seamless integration of digital and analog is what makes modern electronic devices so versatile.

Digital-Analog Converters (DACs) and Analog-Digital Converters (ADCs) are classic examples of the intersection between digital and analog VLSI design. DACs convert digital data (binary) into analog signals, allowing devices to play audio or generate voltages. Conversely, ADCs convert analog signals (e.g., from sensors) into digital data that can be processed by digital components.

Key Concepts in VLSI Design

Transistors: Transistors are the fundamental building blocks of VLSI circuits. Digital VLSI design primarily relies on Metal-Oxide-Semiconductor Field-Effect Transistors (MOSFETs), which act as switches to control the flow of electrical current. Analog circuits may use a variety of transistor types, including bipolar junction transistors (BJTs).

Logic Gates: Digital VLSI design employs logic gates to perform operations on binary data. Common logic gates include AND, OR, NOT, XOR, and NAND gates. These gates are used to build more complex digital circuits.

Clock Signals: In digital VLSI design, clock signals synchronize the operation of various components. They ensure that data is processed at the right time and in the correct order, which is crucial for the reliable operation of digital systems.

Power Management: Managing power consumption is a critical aspect of VLSI design, especially for battery-operated devices. Techniques like clock gating and voltage scaling are employed to minimize power usage in digital circuits, while analog circuits may focus on low-power amplifier and signal conditioning designs.

Challenges in VLSI Design

VLSI design presents a unique set of challenges that designers must overcome to create functional and efficient integrated circuits.

Complexity: As the name suggests, VLSI circuits are very large-scale, often containing millions of transistors. Managing this complexity while ensuring the circuit operates as intended is a significant challenge.

Power Efficiency: Balancing high performance with low power consumption is an ongoing challenge. As technology advances, designers must continually find ways to create more energy-efficient circuits.

Size Constraints: Shrinking transistor sizes lead to smaller chips with more components. Designers must work within the constraints of physical chip sizes while adding more functionality.

Signal Integrity: Maintaining the integrity of both digital and analog signals is vital. Noise, interference, and crosstalk can degrade signal quality, leading to errors or reduced performance.

Testing and Verification: Rigorous testing and verification processes are essential to ensure the reliability of VLSI circuits. This becomes increasingly complex as circuit sizes grow.

Mixed-Signal Integration: Integrating digital and analog components on the same chip requires addressing the interface and compatibility issues between the two domains.

Applications of VLSI Design

VLSI design finds applications in a wide range of electronic devices and systems. Here are some examples:

Microprocessors and Microcontrollers: Digital VLSI design is the foundation of microprocessors and microcontrollers, which power computers, smartphones, and embedded systems.

Memory Chips: VLSI design is used to create various memory chips, including RAM (Random Access Memory) and flash memory.

Custom ASICs: Application-Specific Integrated Circuits (ASICs) are designed for specific tasks and are prevalent in products like consumer electronics, industrial machinery, and automotive systems.

Wireless Communication: RF (Radio Frequency) chips for wireless communication devices, such as Wi-Fi, Bluetooth, and cellular communication, are designed using VLSI techniques.

Analog Front-Ends: VLSI is instrumental in creating analog front-ends for sensors, audio amplifiers, and other analog processing applications.

Signal Processing: VLSI is used for digital signal processing in applications like image and audio processing, as well as in medical devices like MRI machines.

Mixed-Signal Systems: Many modern devices, like smartphones and wearable technology, incorporate both digital and analog VLSI components for optimal functionality.

6. Participants Participation and Feedback:

- 120

7. Participants Feedback:

Based on the feedback forms collected:

- 80% of participants found the course content relevant and useful.
- 70% appreciated the hands-on experience.
- 20% wanted more emphasis on certain advanced topics, suggesting these could be included in a follow-up course.
- 92% expressed satisfaction with the course instructors' knowledge and teaching methods.

8. Conclusion

VLSI design, encompassing both digital and analog domains, is at the heart of modern electronic technology. It is responsible for creating the chips and integrated circuits that power our computers, smartphones, and countless other electronic devices. The fusion of digital and analog VLSI design allows us to enjoy the best of both worlds – the precision of analog processing and the computational power of digital logic. As technology continues to advance, VLSI designers face the challenge of creating increasingly complex and energy-efficient circuits while pushing the boundaries of what is possible in the world of electronics.

About civil engineering Department

The department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech program. At present the department intake for undergraduate (B.Tech) is 60. The department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organisations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, seminars and conferences.

The civil department is well equipped with spacious laboratories and experienced technicians. The department of civil engineering also offers various consultancy works.

About the course

In its pursuit of excellence in technical education the department of Civil Engineering of Bullayya Engineering College have organised the add on course on “**Rock to Ashes & Ashes to rock- Advanced Concrete Technology**” from **5/08/2019 to 09/08/2019**, in seminar hall with an objective to develop students practical knowledge with respect to resource management and concrete technology. This workshop gives the additional knowledge to the students in addition to the regular curriculum.

**Report on Add-on Course
Rock to Ashes & Ashes to Rock – Advanced Concrete Technology
05-08-2019 to 09-08-2019**

About CIVIL Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech Programme. At present the Department intake for undergraduate (B.Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

The Civil Department is well equipped with spacious laboratories and experienced technicians. The department of Civil Engineering also offers various consultancy works.

About The ADD-ON:

In its pursuit of excellence in technical education the Department of Civil Engineering has organized the “**Rock to Ashes & Ashes to Rock – Advanced Concrete Technology**”, with an objective to develop students’ practical knowledge with respect to planning and architecture in Civil Engineering to the students.

ABOUT ADVANCED CONCRETE TECHNOLOGY

While at present mostly recycled into road subbase, the amount of demolished concrete in Japan is expected to increase rapidly and exceed the demand for road subbase in the near future. To promote the recycling of concrete, a technology to produce high-quality recycled aggregate has been developed. This technology employs the heating and rubbing method. In order to investigate a future concrete recycling system, first of all, a specific model considering indices of economic activity is established to forecast the amount of demolished concrete in the future. Furthermore, an input-output table is extended by a detailed description of concrete-related industries such as construction, aggregate, cement, and ready-mixed concrete, and several concrete recycling processes have been added. The linear

programming model connected to the input-output table assumes that the technology will be introduced in 2020. A subsidy for high-quality recycled aggregate and a carbon tax are found to be effective ways to promote the early introduction of the technology. This series of analysis can be widely used in other countries for investigating suitable recycling systems focusing on the cement and concrete industry as well as the applicability of each individual concrete recycling technology.

Day-1 -05/08/2019

On First day of TRAINING PROGRAMME explained about

Ancient Usage of Concrete and modification ,latest techniques for improving concrete

The program started at 9:30 am on 05 -08-2019 followed by the Inaguration schedule at Block-7 seminar hall with Resource person Mrs. Dr.N . Bhanumathidas Director General and Mr.N.Kalidas in Association with Aylin Technologies. Head of the department, Civil Engineering teaching faculty and all the Non-teaching faculty were marking the inauguration of One-Week Training Programme.

Day 1 started with the resource person of the day. Her topic was Ancient usage of concrete “Introduction to history of concrete and oldest concrete structures physical modification of concrete mix and also RHT material model for improved numerical simulation of dynamic response of concrete .

Day-2 -06/08/2019

On second day of TRAINING PROGRAMME explained about

Self Compacting Concrete and Various construction techniques using self compacting concrete

SCC flows like “honey” and has a nearly a horizontal concrete level after placing with regard to its composition, conventionally vibrated normal concrete. A case studies of applications of self compacting concrete structures. Mix design of self compacting concrete.

Day-3 -07/08/2019

On Third day of TRAINING PROGRAMME explained about

High strength concrete and Prestressed concrete.

Structural properties of high strength concrete and its implications for precast and prestressed concrete ,Properties of high strength concrete subjected to short term loads, Effect of fly ash on the durability properties of high strength concrete and also effect of temperature on thermal properties of high strength concrete

Day-4 -08/08/2019

On Fourth day of TRAINING PROGRAMME explained about

Advanced cementations composite structure of fresh concrete and its advantages over concrete

Advanced materials of composite floor slab deformations performance is good. The destruction of the simple cement type composite. In composite type cementation floor, self tapping etc. Advanced drilling processes for composite laminates. Such improvement and development will benefit the construction of structures

On the microstructure and properties of an advanced cemented carbide system processed by selective laser melting and nano structured WC-12 composite powders are used.

Day-5- 9/08/2019

On Fifth day of TRAINING PROGRAMME explained about

Rocks to Ashes And Ashes to Rocks and overall discussions

Morphology and petrography of volcanic ash samples collected from a variety of recent eruptions were using in construction and general discussion about the course and clarification of the doubts in the session

Valedictory Function

The valedictory function was initiated and anchored by Ms.V.Lalitha, II B.Tech Civil. The dais was shared by Dr.Deepak Chowdhary, Principal, LBCE, Dr.G.T.Naidu HOD, Civil Department, LBCE, Dr.N.Bhanumathidas and Mr.N.Kalidas.

Dr. Deepak Chowdhary, Principal, LBCE has appreciated the Resource persons and also students. He advised to organize similar workshops and event for the benefit of students for exploring their potentials.

The program was concluded with vote of thanks by Dr.G.T.Naidu, HOD, Civil Department,

Course Out Comes

- 1.After completing the Rock to Ashes & Ashes to Rock training, individuals can work as self compacting concrete structure .It is used in the construction where it is hard to use vibrators for consolidation of concrete.
- 2.Very good opportunity for students to interact with Experts.
- 3 .Develops confidence and helps to enhance their interpersonal skills.

Report on ADD-ON PROGRAM ON ACCELERATED MULTIMEDIA APPLICATION AND WEB DESIGNING: FIVE-WEEKS CERTIFICATE PROGRAM.

Duration: 15-11-2019 to 31-01-2020

The Accelerated Multimedia Application and Web Designing Add-On Program is a comprehensive five-week certificate program designed to equip participants with advanced skills in multimedia application development and web designing. The program focuses on hands-on learning and practical applications to ensure a thorough understanding of the latest tools and technologies in the field.

Program Overview:

This program is structured to provide a fast-paced and intensive learning experience, covering key aspects of multimedia application development and web designing. Participants will engage in a series of modules that include both theoretical concepts and practical exercises to reinforce their skills.

Duration: Five weeks

Objective:

The primary objective of this program is to empower participants with the knowledge and skills necessary to excel in the dynamic fields of multimedia application development and web designing. By the end of the program, participants should be proficient in utilizing various tools, frameworks, and design principles to create innovative and visually appealing multimedia applications and websites.

Target Audience:

This program is ideal for:

1. Aspiring multimedia application developers.
2. Individuals looking to enhance their web designing skills.
3. Students and professionals seeking to stay updated with the latest trends in multimedia and web technologies.

Number of Students Attended: 138

Details of the Resource Person: 1) Mr.B.SantosKumar,
Assistant Professor,
CSE Department,
Dr.Lankapalli Bullayya College of Engineering for Women.

2) Mr.D.Srikanth,
Assistant Professor,
CSE Department,
Dr.Lankapalli Bullayya College of Engineering for Women.

Methodology:

The program employs a blended learning approach, combining lectures, hands-on workshops, case studies, and real-world projects. Participants will work on practical assignments that simulate industry scenarios, ensuring a holistic understanding of multimedia application development and web designing.

Outcome:

Upon completion of the program, participants will:

1. Possess advanced skills in multimedia application development.
2. Demonstrate proficiency in web designing principles and tools.
3. Understand the integration of multimedia elements in web development.
4. Have hands-on experience with industry-standard software and frameworks.
5. Showcase a portfolio of projects highlighting their capabilities.

Conclusion:

The Accelerated Multimedia Application and Web Designing Add-On Program is a strategic investment for individuals seeking to thrive in the fast-evolving world of multimedia and web technologies. The program's holistic approach ensures that participants not only gain theoretical knowledge but also develop the practical skills needed to succeed in real-world applications. This certificate program is a gateway to unlocking exciting opportunities in the dynamic and competitive fields of multimedia application development and web designing.

About EEE Department

The Department of Electrical Electronics Engineering was established in the year 2010 with an annual intake of 60 students for B.Tech Program. The Department has a mix of both experienced and young faculty. All the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops etc conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences and seminars.

About the Course

In pursuit of technical education the department of Electrical and Electronics Engineering of Dr.Lankapalli Bullayya College of Engineering is organising the "Two Week Add-on Course Electrical Energy Auditing and Management Systems" from 25-11-2019 to 07-12-2019, with an objective to develop students practical knowledge with respect to PLC and Automation Secor. This workshop is organized to provide additional knowledge to the students in addition to the regular curriculum.

***Report on
Two Week Add-on Course
Electrical Energy Auditing and Management Systems***

Duration: 25-11-2019 to 07-12-2019

The two-week add-on course on "Electrical Energy Auditing and Management Systems" was structured to provide participants with an intensive and holistic understanding of energy auditing principles, methods, tools, and applications, focusing on electrical systems. A combination of theoretical lessons, practical sessions, case studies, and hands-on activities were implemented to create a multifaceted learning experience.

Details of the Resource Person: Dr. J.Balamurugan,
Senior Manager,
Tamil Nadu Energy Development Agency

Details of the Program Coordinator: Ch Arun Kumar
Assistant Professor, EEE Department
Dr.Lankapalli Bullayya College of Engineering for Women.

Number of Students Attended: 125

1. Introduction

Electrical energy auditing is a systematic approach to assess the energy consumption of a facility to identify inefficiencies and recommend improvements. Management systems, on the other hand, offer frameworks for implementing, monitoring, and optimizing energy-related operations. Together, they play a crucial role in promoting energy conservation, reducing costs, and minimizing environmental impacts.

2. Course Objectives

Equip participants with the skills and knowledge necessary to conduct a comprehensive electrical energy audit, analyze the results, and implement effective energy management practices.

3. Course Highlights

- Introduction to Energy Management
- Concept of Energy Auditing

- Instruments and Tools for Energy Auditing
- Electrical Systems Overview, Data Collection and Field Measurements
- Analysis Techniques
- Lighting Systems Audit
- Motor and Drives Audit
- HVAC and Refrigeration Systems Audit
- Recommendations and Report Writing
- Case Studies
- Energy Management Systems (EMS), Software for Energy Analysis

4. Learning Outcomes:

By the end of the course, participants will:

1. Understand the importance of energy auditing and its role in energy conservation.
2. Be proficient in using various instruments essential for energy auditing.
3. Analyze the energy consumption patterns of various electrical systems.
4. Draft detailed energy audit reports with practical recommendations.
5. Understand the functioning and advantages of Energy Management Systems.

5. Participants Feedback:

Based on the feedback forms collected:

- 90% of the participants found the course content relevant and useful.
- 80-90% of the participants gave 'Excellent' or 'Very Good' rating.

6. Conclusion

Electrical energy auditing and management systems are more than just tools for conservation—they represent a shift towards a sustainable, efficient, and cost-effective future. As technology continues to evolve, these systems will only become more integral to how businesses and institutions operate, ensuring a greener and more prosperous future for all.

It is an intensive educational program that focuses on teaching students various design patterns used in software development. These design patterns are reusable solutions to common problems encountered in software design and development. The program equips students with the knowledge and practical skills needed to apply these design patterns in real-world software projects, enhancing their ability to create efficient and maintainable software solutions.

DESIGN PATTERN OBJECTIVES

- Introduction to Design Patterns
- Creational Design Patterns
- Structural Design Patterns
- Behavioral Design Patterns
- Model-View-Controller (MVC) Pattern
- Design Patterns in Real-World Applications
- Anti-Patterns and Common Pitfalls
- Design Patterns and Refactoring
- Testing and Maintenance with Design Patterns
- Design Pattern Documentation and UML
- Collaboration and Teamwork

COURSE OUTCOME

- Proficiency in understanding and applying design patterns in software development.
- Ability to identify and implement creational, structural, and behavioral design patterns in code.
- Competence in using the Model-View-Controller (MVC) architectural pattern to organize software components.
- Practical experience in applying design patterns to real-world software development scenarios.
- Recognition of common anti-patterns and pitfalls, with the knowledge to avoid or mitigate them.

TABLE OF CONTENTS OUTLINE

- Introduction to Design Tools
- Graphic Design Principles
- Adobe Creative Suite
- UI/UX Design Fundamentals
- Web Design and Development Tools
- 3D Design and Animation
- Typography and Layout
- Portfolio Development
- Real-World Projects
- Time and Project Management

Report on DESIGN-PATTERN SOFTWARE DEVELOPMENT: FOUR-WEEKS CERTIFICATE PROGRAM

Duration: 25-11-2019 to 30-12-2019

The Add-on Program on Design-Pattern Software Development is a comprehensive and intensive FOUR-week certificate program aimed at equipping participants with advanced skills in designing and implementing software solutions using design patterns. This program delves into the principles and practices of design patterns, providing hands-on experience and practical insights to enhance participants' proficiency in software development.

Program Overview:

This program covers a wide array of design patterns, including creational, structural, and behavioral patterns. Participants will engage in a blend of theoretical learning and practical implementation, utilizing industry-standard tools and best practices. The curriculum is structured to progressively build participants' expertise in designing robust and scalable software architectures.

Duration: Four weeks

Objective:

The primary objective of this program is to empower participants with a deep understanding of design patterns and their application in software development. By the end of the program, participants should be proficient in identifying and implementing appropriate design patterns to address various software design challenges.

Target Audience:

This program is tailored for software developers, architects, and engineers seeking to enhance their proficiency in software design. It is suitable for individuals with a foundational knowledge of programming and software development, looking to elevate their skills to the next level.

Number of Students Attended: 127

Details of the Resource Person: 1) Dr. D. Madhavi,
Professor & HOD,
CSE Department,
Dr.Lankapalli Bullayya College of Engineering for Women.

2) Dr.G.Vamsi Krishna,
Sr. Assistant Professor,
CSE Department,
Dr.Lankapalli Bullayya College of Engineering for Women.

Methodology:

The program adopts a hands-on and interactive approach, combining lectures, group discussions, and practical exercises. Participants will work on real-world projects, applying design patterns to solve complex problems. The program also includes guest lectures from industry experts, providing valuable insights into the practical application of design patterns in different domains.

Outcome:

Upon completion of the program, participants will:

1. Possess a comprehensive understanding of various design patterns.
2. Demonstrate the ability to apply design patterns in real-world software development projects.
3. Develop efficient and scalable software architectures using best practices.
4. Collaborate effectively with team members in implementing design patterns

Conclusion:

The Add-on Program on Design-Pattern Software Development is a valuable investment for professionals looking to advance their skills in software design. The FOUR-week certificate program offers a rich learning experience, combining theoretical knowledge with practical application, ultimately preparing participants to excel in the dynamic and evolving field of software development.

CIRCULAR

It is hereby informed to all the ECE B.Tech students that, we are conducting an Add-on program on "A 10 day Add-on Program Electronic Circuit Analysis and Design using MULTISIM" in the dates of 26-12-2019 to 06-01-2020 in our college to improve skills and knowledge. All the interested students enroll your names for the Add-on program and participate actively.

ABOUT THE ECE DEPARTMENT

The Department of Electronics and Communication Engineering was established in the year 2010 with an annual intake of 120 students for B.Tech Program. The Department has a mix of both experienced and young faculty. All the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge.

ABOUT THE COURSE

In pursuit of technical education, the department of Electronics and Communication Engineering of Dr. Lankapalli Bullayya College of Engineering (for women) have organized the ADD-ON Course on "A 10 day Add-on Program Electronic Circuit Analysis and Design using MULTISIM" from 26-12-2019 to 06-01-2020, with an objective to develop students practical knowledge with respect to MULTISIM. This workshop is organized to provide additional knowledge to the students in addition to the regular curriculum.

Report on

A 10-day Add-on Program Electronic Circuit Analysis and Design using MULTISIM

Duration: 10 days (26-12-2019 to 06-01-2020)

Name of the Resource Person: M. Sravani (Asst. Prof. ECE Dept.)

Course Coordinators: Mrs. A. MANASA (Asst. Prof. ECE Dept.)

Mrs. K. LALITHA (Asst. Prof. ECE Dept.)

Introduction

Electronic circuit analysis and design are fundamental components in the field of electrical engineering. Multisim, a software tool developed by National Instruments, provides a powerful platform for simulating, analyzing, and designing various electronic circuits. This report aims to explore the utilization of Multisim in understanding, analyzing, and designing electronic circuits, highlighting its key features and applications.

Key Features of Multisim

Multisim offers a user-friendly interface coupled with a wide range of features that facilitate circuit analysis and design. Some of the essential features include:

1. Circuit Simulation Capabilities:

- Multisim allows the simulation of analog, digital, and mixed-signal circuits, providing a comprehensive analysis of circuit behavior under different conditions.
- It facilitates the testing of circuits before actual implementation, which significantly reduces prototyping costs and time.

2. Component Library:

- The software provides an extensive library of electronic components, including resistors, capacitors, transistors, integrated circuits, sensors, and more. This allows users to access a broad range of components for circuit design.

3. Graphical User Interface (GUI):

- Multisim features an intuitive GUI that enables users to construct circuits easily by selecting and placing components, connecting them, and configuring their properties.

- The GUI simplifies the process of circuit design, making it accessible for both beginners and experienced engineers.

4. Analysis Tools:

- It offers various analysis tools such as AC, DC, transient, and frequency domain analyses, enabling users to assess circuit performance under different conditions.
- Parameters like voltage, current, power, frequency response, and phase can be analyzed using these tools.

Applications and Circuit Design Using Multisim

Multisim finds applications in a wide array of electronic circuit designs, including but not limited to:

1. Amplifier Circuits:

- Design and analysis of operational amplifiers, power amplifiers, and other types of amplification circuits.

2. Filter Design:

- Implementing various types of filters, such as low-pass, high-pass, band-pass, and band-stop filters, and analyzing their frequency responses.

3. Digital Circuits:

- Creating and simulating logic gates, flip-flops, counters, and other digital circuits to understand their behavior and functionality.

4. Power Supply Circuits:

- Designing and analyzing different types of power supply circuits, including linear and switching power supplies.

Case Study: Designing an RC Low-Pass Filter

5. Let's consider the design of an RC low-pass filter using Multisim to demonstrate its application in circuit design:

1. Component Selection:

- Choose appropriate resistor and capacitor values for the desired cutoff frequency.

2. Circuit Design:

- Construct the RC low-pass filter circuit using the selected components in Multisim.

3. Simulation and Analysis:

- Simulate the circuit to observe its frequency response, voltage across the components, and overall filter performance.

4. Parameter Optimization:

- Modify component values to observe changes in filter behavior and understand the impact of these alterations.

6. Participants: 121

7. Participants Feedback:

Based on the feedback forms collected:

- 80% of participants found the course content relevant and useful.
- 75% appreciated the hands-on experience.
- 20% wanted more emphasis on certain advanced topics, suggesting these could be included in a follow-up course.
- 92% expressed satisfaction with the course instructors' knowledge and teaching methods.

Explaining Design procedure on MULTI SIM

8. Conclusions and Recommendations:

Multisim stands as a valuable tool for electronic circuit analysis and design. Its versatile features, intuitive interface, and extensive simulation capabilities make it an indispensable resource for engineers and students in the field of electrical engineering. The software's ability to simulate, analyze, and optimize circuits significantly contributes to the development and understanding of various electronic systems.

In conclusion, the utilization of Multisim in electronic circuit analysis and design not only enhances the learning experience but also provides a practical platform for engineers to innovate and optimize circuit designs efficiently.
