ABSTRACT

In this study, an attempt is made for preparing **"ANALYSIS AND LAYING OF BITUMINOUS ROAD"** in DR.LANKAPALLI BULLAYYA COLLEGE OF ENGINEERING VISAKHAPATNAM.

From this period of Industrial and Project report, we learnt about:

1. Preparation of detailed Estimates for Borewells , Godowns, Water supply lines.
2. Creating Longitudinal Sections and Cross Sections for roads.
3. Handling the instruments used in the site.
4. Mastered the Total Station.
5. Plotting Points using Total Station.
6. Cross-checking the Level field books.
7. Knowing about different materials on the site .
8. Performing various tests for materials used at site.
9. Analysis of drawings and CAD Drawings.
10. Safety measures to be taken at the site.
11. Site Supervising.

ABSTRACT

Internship training at Visakhapatnam Port Authority has provided an in-depth exposure to the activities of civil engineering as it constitutes many on-going civil projects continuously and from engineering divisions which cover almost every aspect of civil engineering we have covered during our time in BTech Civil. East Division office, West division (R&D), SS Nagar, etc., that gives a great practical exposure to civil works and this study is completely about what we have learnt during the 45 Days of our internship training in Visakhapatnam Port Authority.

PROJECTREPORT

A Study of various works/activities at the division of Civil Engineering Department, in Visakhapatnam Port Authority ,is submitted for the partial fulfillment of the requirements of Industrial Training in 7th Semester as part of the course in B- Tech in Civil Engineering done at Visakhapatnam Port Authority, offered by State Board of Technical Education & Training,AP under the Guidance of

ABSTRACT

In this study, an attempt is made for preparing of

"Analysis of repairs works in parks" in

Dr. Lankapalli bullaya college of engineering

Under the guidance of Sri: Suresh ,harsh reddy.

By learning constructions and repairs in various steps.

From this project, we learnt about:

- EARTHWORK EXCAVATION.
- LAYING OF CRUSHER DUST.
- PROCEDURE OF MIXING CEMENT, CONCRETE AND CEMENTMORTOR.
- PROCEDURE OF BRICKWORK CONSTRUCTION.
- PROCEDURE AND LOCAL TERMS IN PLASTERING WORK.
- PROCEDURE OF CURING
- CALCULATION OF PAINTING WORKS IN Sqft
- CALCULATION OF WIRES AND POLES QUANTITY.
- PROCEDURE OF PREPARING BILLS.
- PREPARING OF BILL FOR CONSTRUCTION WORK.
- MEASURING OF LANDS AND AREAS

Date:

PROJECT REPORT

A study of various works/activities in project section department in Greater Visakhapatnam Municipal Corporation, is submitted for the partial-fullfillment of the requirements of industrial training in 6th semester as part of the course in "**BTech Civil Engineering"** done at GVMC, under the Guidance of

G.T.Naidu

Head of department

DEPARTMENT OF CIVIL ENGINEERING

DR. LANKAPALLI BULLAYA COLLEGE OF ENGINEERING

(VISAKHAPATNAM)

2020 to 2024

ABSTRACT

Internship training at GVMC has provided an in-depth exposure to the activities of civil engineering as it constitutes many on going civil projects continuously. During this training we gained a lot of practical knowledge in civil works apart from bookish knowledge. This report mainly consists of what we have covered during our time in GVMC which covers almost every aspect of Civil Engineering works, that gives a great exposure to civil works and this study is completely about what we have learnt during the 45 days of our internship training in GVMC Projects Section.

DLBCE/Internship/2023-24

2nd June 2023

To
Chief Engineer
Greater Visakha Municipal Corporation
Visakhapatnam

Sub: Request for Internship Training

Sir,

Dr. Lankapalli Bullayya College, Visakhapatnam was started in 1973 by "The Society for Collegiate Education" prevailing in the heart of the City. The College is affiliated to Andhra University. Till 2010 the Institute used to offer Intermediate, UG, PG Programs including MCA, MBA.

From the academic year 2010-2011 the Management has taken all effort to start Dr. Lankapalli Bullayya College of Engineering with B.E/B.Tech programs with Computer Science Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Civil Engineering specializations with 360 student intake annually. The primary objective and scope of the institution is to promote technical and higher education.

As part of the Andhra University Academic Curriculum the students are required to undergo Internship in a study related organization or firms during the course of their study.

Hence, we are sending the following student from Civil to undergo Internship training in a reputed organization like yours, which will be useful for furtherance of their carrier, for a period of one month in June 2023.

Sl.No.	Student Name	Roll No.

Sub: Request for Internship Training

Sir,

Dr. Lankapalli Bullayya College, Visakhapatnam was started in 1973 by "The Society for Collegiate Education" prevailing in the heart of the City. The College is affiliated to Andhra University. Till 2010 the Institute used to offer Intermediate, UG, PG Programs including MCA, MBA.

From the academic year 2010-2011 the Management has taken all effort to start Dr. Lankapalli Bullayya College of Engineering with B.E/B.Tech programs with Computer Science Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Civil Engineering specializations with 360 student intake annually. The primary objective and scope of the institution is to promote technical and higher education.

As part of the Andhra University Academic Curriculum the students are required to undergo Internship in a study related organization or firms during the course of their study.

Hence, we are sending the following students from Civil Engg undergo Internship training in a reputed organization like yours, which will be useful for furtherance of their carrier, for a period from 09.06.2023 to 04.07.2023/.

Sl.No.	Student Name	Roll No.

DR LANKAPALLI BULLAYYA COLLEGE OF ENGINEERING

VISHAKAPATNAM

An internship report submitted on the analysis of the work done under

ROADS AND BUILDINGS DEPARTMENT

Of

B.Tech {Civil Engineering }

by

(BATCH I)

INTRODUCTION

Engineering is the professional art of applying science to the optimum conversion of the resources of the nature to benefit man. As a. Career oriented applied education, civil engineering students internship program bridges the gap between theory and practical, field based and real world experience during their years of study .

Internship program is an opportunity for the students as a site engineer to supervise the construction work closely as a design.

Engineer to use software programs. In practical training, one learns to determine quantities of materials and learn the important rule of engineer's life i.e "Think Globally but act Locally ".

AIM The aim of this report is to apprise concerned tutor ongoing intership activities.

ABSTRACT

In this study, an attempt is made for preparing "Analysis of building construction" from Dr. Lankapalli Bullayya College of Engineering, Visakhapatnam.

From this period of industrial and project report,

We learnt about:

1. Brick wall construction.
2. Plastering of walls.
3. Plumbing works.
4. Electrical wiring.
5. Analysis of drawings.
6. Analysis in handling the instruments and equipment used in site.
7. Knowing about different materials used at site .
8. Safety measures to be taken at the site.
9. Site supervising.

BT ROADS

The Surface of bituminous roads are protected by binding material such as bitumen, tar, asphalt, cut backs and emulsions. These are also termed as black top roads (B.T. roads) and used in highways, roads in cities etc. These roads are to be laid with low cost, faster orin stages.

Bitumen is a mixture of natural pyrogenous hydrocarbon and their metallic derivatives which may be gaseous, liquid, viscous, solids but must be completely soluble in Carbon sulphide. It is blackish in colour, sticky in nature, semisolid and melts when heated.

BITUMEN LAYERS

1. Granular Sub Base
2. Wet Mix
3. Bitumen Macadam
4. Bitumen Concrete

1.GRANULAR SUB BASE (GSB):

Granular-Sub-base is often used as subbase layer of the pavement. The main role of this layer is to spread evenly the load over the subgrade. The subbase shall consist of a uniform mixture of granular material placed on a subgrade, uniformly moistened, shaped, and compacted, all in accordance with the contract documents. The work shall consist of laying and compacting of well-graded materials on a prepared and approved sub-grade

Tr

- **Residential Building:** Buildings in which sleeping arrangements are provided with or without cooking arrangement. It includes single or multi-family dwelling, apartments, lodgings, restaurants, hostels, dormitories and hotels
- **Educational building:** These Include any building used for school, college, education purposes.
- **Institutional Building:** these buildings used for different purposes, such as medical or other treatment. They include hospitals, sanatorium, jails, asylum

SITE SELECTION

- The selection of suitable site is a crucial step in the design of a building or planning a settlement in an earthquake prone area.
- There are a number of earthquake related hazards which should always be considered when choosing a site, together with the influence of the ground conditions at the site on the ground motion which the building may experience in a future earthquake.
- An assessment of extent of earthquake hazard should always form a part of overall site assessment and of specification for the design of any structures to be built there.
- No site can be expected to be ideal in all respects, so the choice of site will often involve a judgment about relative risks and the costs of designing to protect from them.
- But there can be some sites which could be so hazardous that they should be avoided if at all possible, since the cost of building is likely to be prohibitive.
- A few important considerations for selecting the an appropriate site are given below

ABSTRACT

In this study, an attempt is made for Learning about the Field works involved in "Development of Layouts" Involving Formation of Gravel Roads, Planning and Laying storm water drains, Culverts and other Layout Infrastructure Related works.

From this period of Industrial and Project report, we learnt about:

1. ***Preparation of detailed Estimates for Borewells , Godowns, Water supply lines.***
2. ***Creating Longitudinal Sections and Cross Sections for roads.***
3. ***Handling the instruments used in the site.***
4. ***Mastered the Total Station.***
5. ***Plotting Points using Total Station.***
6. ***Cross-checking the Level field books.***
7. ***Knowing about different materials on the site .***
8. ***Performing various tests for materials used at site.***
9. ***Analysis of drawings and CAD Drawings.***
10. ***Safety measures to be taken at the site.***
11. ***Site Supervising.***

ACKNOWLEDGEMENT

We take this opportunity to express our gratitude and sincere thanks to all who helped us to complete the project successfully.

We express our deepest gratitude and sincere thanks to our esteemed guide SRI.ESWAR SAI, ASSISTANT ENGINEER,ESWARA SAI CIVIL CONSULTENCY, VISAKHAPATNAM, for his valuable guidance, encouragement, and help completing this work. His useful suggestions for this whole work and cooperation behavior are sincerely acknowledged.

We are grateful to DR.GTNAIDUSIR, M.TECH, Head of the Civil Engineering section, for his support during the tenure of the project. We also express our Dispense of gratitude DR.DEEPAK CHOWDARY SIR, Principal Sir for his kind cooperation and extendible support towards the completion of our project.

We are also grateful to our teachers for their constant support and guidance. And we would like to thank all our parents and friends who extended their help, encouragement, and moral support either directly or indirectly in our project work.

Sub: Request for Internship Training

Sir,

Dr.Lankapalli Bullayya College, Visakhapatnam was started in 1973 by "The Society for Collegiate Education" prevailing in the heart of the City. The College is affiliated to Andhra University. Till 2010 the Institute used to offer Intermediate, UG, PG Programs including MCA, MBA.

From the academic year 2010-2011 the Management has taken all effort to start Dr. Lankapalli Bullayya College of Engineering with B.E/B.Tech programs with Computer Science Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Civil Engineering specializations with 360 student intake annually. The primary objective and scope of the institution is to promote technical and higher education.

As part of the Andhra University Academic Curriculum the students are required to undergo Internship in a study related organization or firms during the course of their study.

Hence, we are sending the following student from Civil to undergo Internship training in a reputed organization like yours, which will be useful for furtherance of their carrier, for a period from 08.06.2023 to 04.07.2023

Sl. No.	Student Name	Roll No.

KINCHE SANTOSH KUMAR (321136408028)

ACKNOWLEDGMENT

Behind every achievement there lies an unfathomable sea of those who energise, if without whom it would ever have existence with great pleasure that we take the occasion to express our heartfelt gratitude and sincere thanks to our esteemed institution ***"DR LANKAPALLI BULLAYYA COLLEGE OF ENGINEERING, VISAKHAPATNAM"*** *which has provided an opportunity to fulfil our cherished desire and reach our goals with sincerity.*

We are grateful to ***DR.GT NAIDU SIR*** *, B.Tech, Head of Civil Engineering section for devoting considerable time and effort and his outstanding contribution including confidence and his increased interaction sharing knowledge and expertise with us is remarkable.*

We thank ***DR. DEEPAK CHOWDARY SIR*** *, Principal sir for extending his support for infrastructure and labs for successful completion of our project.*

We sincerely thank our teaching and non-teaching staff in ***DR.LANKAPALLI BULLAYYA COLLEGE OF ENGINEERING , VISAKHAPATNAM*** *for their sustained help throughout our Project.*

ABSTRACT

From this period of Industrial and Project report , we learnt about :

(a)

1. *Construction of footings*
2. *Laying of columns*
3. *Arrangement of reinforcement rods*
4. *Construction of plinth beams*
5. *Carpenter work for footings*
6. *Filling concrete*
7. *Vibration of concrete*

(b)

1. *Brick masonry work*
2. *Mixing of cement mortar*
3. *Plastering*

Dynamik Developers

Better Home Better Life

CERTIFICATE

This is to certify that Mr. Kinche Santosh Kumar, Roll No: 321136408028, studying B.Tech,Civil Engineering at Dr. LankapalliBullayya College, Visakhapatnam, has attended and completed project work on construction of residential apartments at our project, Dynamik MIHIRA Enclave, PM Palem site during the period from 10-06-2023to07-07-2023.

CERTIFICATE / LOR

We are glad to inform you that Sai Aditya Tanniru from Dr. Lankapalli Bullayya College of Engineering has successfully completed the internship program at Brahmastra Aerospace & Defence Private Limited from 11-09-2023 to 07-10-2023.

During the internship, the candidate was exposed to various activities and discussions in the internship division, the candidate also closely worked as a part of the Project trainee program and the candidate successfully completed the role of project trainee entitled to Brahmastra Aerospace Vehicle Design Internship at Brahmastra Aerospace & Defence Private Limited.

We found the candidate to be extremely inquisitive and hard-working. The candidate was much interested in learning the functions of our core division and willing to put their best efforts to understand the subject and willing to work towards creative thinking. The candidate worked with various software and met the objectives of the project.

The candidate's association with us was very fruitful and we wish him all the best in his future endeavors.

Subash P Kuppusamy,
Founder & CEO

INTRODUCTION

The telephone is a telecommunication device that is usedto transmit and receive electronically ordigitally encoded speech between two or more people conversing.

Telecommunication networks carry information signals among entities, which are geographically far apart.The entities are involved in the process of informationtransfer thatmay be in the form of a telephone conversation or a file transfer between two computers or message transfer between two terminalsetc.

With the rapid growth of trafficand cyberspace ,telecommunication became an integral part of our life. Thefuture challenges are enormous as weanticipate rapid growth items of new services and number ofusers. Telecommunicationhas evaluated andgrowthat an explosive rate in recent yearsand will undoubtedly continue to doso.

The telecommunication links and switching were mainly designed for voice communication.With the appropriate attachments, they can be used to transmitdata.A modern society, thereforeneedsnewfacilities including very high bandwidthswitcheddata networks,andlarge communication satellites withsmall,cheapearthantennas.

INTRODUCTION

The telephone is a telecommunication device that is usedto transmit and receive electronically ordigitally encoded speech between two or more people conversing.

Telecommunication networks carry information signals among entities, which are geographically far apart.The entities are involved in the process of informationtransfer thatmay be in the form of a telephone conversation or a file transfer between two computers or message transfer between two terminalsetc.

With the rapid growth of trafficand cyberspace ,telecommunication became an integral part of our life. Thefuture challenges are enormous as weanticipate rapid growth items of new services and number ofusers. Telecommunicationhas evaluated andgrowthat an explosive rate in recent yearsand will undoubtedly continue to doso.

The telecommunication links and switching were mainly designed for voice communication.With the appropriate attachments, they can be used to transmitdata.A modern society, thereforeneedsnewfacilities including very high bandwidthswitcheddata networks,andlarge communication satellites withsmall,cheapearthantennas.

INTRODUCTION

The telephone is a telecommunication device that is usedto transmit and receive electronically ordigitally encoded speech between two or more people conversing.

Telecommunication networks carry information signals among entities, which are geographically far apart.The entities are involved in the process of informationtransfer thatmay be in the form of a telephone conversation or a file transfer between two computers or message transfer between two terminalsetc.

With the rapid growth of trafficand cyberspace ,telecommunication became an integral part of our life. Thefuture challenges are enormous as weanticipate rapid growth items of new services and number ofusers. Telecommunicationhas evaluated andgrowthat an explosive rate in recent yearsand will undoubtedly continue to doso.

The telecommunication links and switching were mainly designed for voice communication.With the appropriate attachments, they can be used to transmitdata.A modern society, thereforeneedsnewfacilities including very high bandwidthswitcheddata networks,andlarge communication satellites withsmall,cheapearthantennas.

PYTHON INTERNSHIP TRAINING PROGRAM

The industrial internship Training Program was organized by the Department of Basic sciences and humanities, TPCT'S college of Engineering, Osmanabad. It was arranged for all branches of F.Y.B.tech students. It was conducted by Fantasy Technologies in the period of 7th June to 2021 to 21/7/21 (45 Days) 90 Hrs. Founder of Fantasy technology are Mrs. Jyoti Tarange and trainer of this course were Mrs.Prarthana Bakshi. This industrial internship Training Program was held under the guidance of Honorable principal Dr.Vikramsingh Mane and coordinator of this program were Prof. Usha Wadne Head of BSH Dept.

Introduction to Python Programming

Python is a widely used high-level, general-purpose, interpreted, dynamic programming language. Its design philosophy emphasizes code readability, and its syntax allows programmers to express concepts in fewer lines of code than would be possible in languages such as C++ or Java. The language provides constructs intended to enable clear programs on both a small and large scale. Python supports multiple programming paradigms, including object-oriented, imperative and functional programming or procedural styles. It features a dynamic type system and automatic memory management and has a large and comprehensive standard library. Python interpreters are available for installation on many operating systems, allowing Python code execution on a wide variety of systems.

Introduction to Python Programming

- Why do we need Python?
- Program structure in Python

Execution steps

- Interactive Shell
- Executable or script files.
- User Interface or IDE

Memory management and Garbage collections

- Object creation and deletion
- Object properties

INTRODUCTION

Radio Broadcasting was pioneered in India by the Madras Presidency Club Radio in 1924. The Club worked a broadcasting service for three years, but owing to financial difficulties gave it up in 1927. In the same year (1927) some enterprising businessmen in Bombay started the Indian Broadcasting Company with stations at Bombay and Calcutta. This company failed in 1930, in 1932 the Government of India took over broadcasting. A separate department known as Indian Broadcasting Service was opened. The Service was later designated 'All India Radio' (AIR) and was placed under a separate Ministry-the Ministry of Information and Broadcasting. The AIR is controlled by a Director General, who is assisted by several Deputy Directors and a Chief Engineer.

Broadcasting, in its significance, reach and impact, constitutes the most powerful medium of mass communication in India. Its importance, as a medium of information and education is particularly great in a vast and developing country like India where the reach of the printed word is not very wide or deep. While the total circulation of all the newspapers in India, including both English and Indian language papers, is around 8 million, there are, according to a recent estimate, nearly 400 million (out of a total population of 625 million) potential listeners to All India Radio. Broadcasting in India is a national service, developed and operated by the Government of India. All India Radio (also known as Akashvani) operates this service, over a network of broadcasting stations located ail over the country.

As a national service, catering to the complex needs of a vast country. All India Radio seeks to represent in its national and regional

programmes, the attitudes, aspirations and attainments of all Indian people and attempts to reflect, as fully and faithfully as possible. the richness of the Indian scene and the reach of the Indian mind.

BROAD CASTING:

Broadcasting is the distribution of audio or video content to a dispersed audience via any electronic mass communications medium, but typically one using the electromagnetic spectrum (radio waves), in a one-to-many model.[1] Broadcasting began with AM radio, which came into popular use around 1920 with the spread of vacuum tube radio transmitters and receivers. Before this, most implementations of electronic communication (early radio, telephone, and telegraph) were one-to-one, with the message intended for a single recipient. The term *broadcasting* evolved from its use as the agricultural method of sowing seeds in a field by casting them broadly about.[2] It was later adopted for describing the widespread distribution of information by printed materials[3] or by telegraph.[4] Examples applying it to "one-to-many" radio transmissions of an individual station to multiple listeners appeared as early as 1898.[5]

Over the air broadcasting is usually associated with radio and television, though more recently, both radio and television transmissions have begun to be distributed by cable (cable television). The receiving parties may include the general public or a relatively small subset; the point is that anyone with the appropriate receiving technology and equipment (e.g., a radio or television set) can receive the signal. The field of broadcasting includes both government-managed services such as public radio, community radio and public television, and private commercial radio and commercial television. The U.S. Code of Federal Regulations, title 47, part 97 defines "broadcasting" as "transmissions intended for reception by the general public,

INTRODUCTION

Radio Broadcasting was pioneered in India by the Madras Presidency Club Radio in 1924. The Club worked a broadcasting service for three years, but owing to financial difficulties gave it up in 1927. In the same year (1927) some enterprising businessmen in Bombay started the Indian Broadcasting Company with stations at Bombay and Calcutta. This company failed in 1930, in 1932 the Government of India took over broadcasting. A separate department known as Indian Broadcasting Service was opened. The Service was later designated 'All India Radio' (AIR) and was placed under a separate Ministry-the Ministry of Information and Broadcasting. The AIR is controlled by a Director General, who is assisted by several Deputy Directors and a Chief Engineer.

Broadcasting, in its significance, reach and impact, constitutes the most powerful medium of mass communication in India. Its importance, as a medium of information and education is particularly great in a vast and developing country like India where the reach of the printed word is not very wide or deep. While the total circulation of all the newspapers in India, including both English and Indian language papers, is around 8 million, there are, according to a recent estimate, nearly 400 million (out of a total population of 625 million) potential listeners to All India Radio. Broadcasting in India is a national service, developed and operated by the Government of India. All India Radio (also known as Akashvani) operates this service, over a network of broadcasting stations located ail over the country.

As a national service, catering to the complex needs of a vast country. All India Radio seeks to represent in its national and regional

INTRODUCTION

Radio Broadcasting was pioneered in India by the Madras Presidency Club Radio in 1924. The Club worked a broadcasting service for three years, but owing to financial difficulties gave it up in 1927. In the same year (1927) some enterprising businessmen in Bombay started the Indian Broadcasting Company with stations at Bombay and Calcutta. This company failed in 1930, in 1932 the Government of India took over broadcasting. A separate department known as Indian Broadcasting Service was opened. The Service was later designated 'All India Radio' (AIR) and was placed under a separate Ministry the Ministry of Information and Broadcasting. The AIR is controlled by a Director General, who is assisted by several Deputy Directors and a Chief Engineer.

Broadcasting, in its significance, reach and impact, constitutes the most powerful medium of mass communication in India. Its importance, as a medium of information and education is particularly great in a vast and developing country like India where the reach of the printed word is not very wide or deep. While the total circulation of all the newspapers in India, including both English and Indian language papers, is around 8 million, there are, according to a recent estimate, nearly 400 million (out of a total population of 625 million) potential listeners to All India Radio. Broadcasting in India is a national service, developed and operated by the Government of India. All India Radio (also known as Akashvani) operates this service, over a network of broadcasting stations located ail over the country.

As a national service, catering to the complex needs of a vast country. All India Radio seeks to represent in its national and regional

INTRODUCTION

Radio Broadcasting was pioneered in India by the Madras Presidency Club Radio in 1924. The Club worked a broadcasting service for three years, but owing to financial difficulties gave it up in 1927. In the same year (1927) some enterprising businessmen in Bombay started the Indian Broadcasting Company with stations at Bombay and Calcutta. This company failed in 1930, in 1932 the Government of India took over broadcasting. A separate department known as Indian Broadcasting Service was opened. The Service was later designated 'All India Radio' (AIR) and was placed under a separate Ministry-the Ministry of Information and Broadcasting. The AIR is controlled by a Director General, who is assisted by several Deputy Directors and a Chief Engineer.

Broadcasting, in its significance, reach and impact, constitutes the most powerful medium of mass communication in India. Its importance, as a medium of information and education is particularly great in a vast and developing country like India where the reach of the printed word is not very wide or deep. While the total circulation of all the newspapers in India, including both English and Indian language papers, is around 8 million, there are, according to a recent estimate, nearly 400 million (out of a total population of 625 million) potential listeners to All India Radio. Broadcasting in India is a national service, developed and operated by the Government of India. All India Radio (also known as Akashvani) operates this service, over a network of broadcasting stations located ail over the country.

As a national service, catering to the complex needs of a vast country. All India Radio seeks to represent in its national and regional

INTRODUCTION

The telephone is a telecommunication device that is usedto transmit and receive electronically ordigitally encoded speech between two or more people conversing.

Telecommunication networks carry information signals among entities which are geographically far apart.The entities are involved in the process of informationtransfer thatmay be in the form of a telephone conversation or a file transfer between two computers or message transfer between two terminalsetc.

With the rapid growth of trafficand cyberspace ,telecommunication became an integral part of our life. Thefuture challenges are enormous as weanticipate rapid growth items of new services and number ofusers. Telecommunicationhas evaluated andgrowthat an explosive rate in recent yearsand will undoubtedly continue to doso.

The telecommunication links and switching were mainly designed for voice communication.With the appropriate attachments, they can be used to transmitdata.A modern society, thereforeneedsnewfacilities including very high bandwidthswitcheddata networks,andlarge communication satellites withsmall,cheapearthantennas.

INTRODUCTION

Radio Broadcasting was pioneered in India by the Madras Presidency Club Radio in 1924. The Club worked a broadcasting service for three years, but owing to financial difficulties gave it up in 1927. In the same year (1927) some enterprising businessmen in Bombay started the Indian Broadcasting Company with stations at Bombay and Calcutta. This company failed in 1930, in 1932 the Government of India took over broadcasting. A separate department known as Indian Broadcasting Service was opened. The Service was later designated 'All India Radio' (AIR) and was placed under a separate Ministry-the Ministry of Information and Broadcasting. The AIR is controlled by a Director General, who is assisted by several Deputy Directors and a Chief Engineer.

Broadcasting, in its significance, reach and impact, constitutes the most powerful medium of mass communication in India. Its importance, as a medium of information and education is particularly great in a vast and developing country like India where the reach of the printed word is not very wide or deep. While the total circulation of all the newspapers in India, including both English and Indian language papers, is around 8 million, there are, according to a recent estimate, nearly 400 million (out of a total population of 625 million) potential listeners to All India Radio. Broadcasting in India is a national service, developed and operated by the Government of India. All India Radio (also known as Akashvani) operates this service, over a network of broadcasting stations located ail over the country.

As a national service, catering to the complex needs of a vast country. All India Radio seeks to represent in its national and regional

INTRODUCTION

The telephone is a telecommunication device that is usedto transmit and receive electronically ordigitally encoded speech between two or more people conversing.

Telecommunication networks carry information signals among entities, which are geographically far apart.The entities are involved in the process of informationtransfer thatmay be in the form of a telephone conversation or a file transfer between two computers or message transfer between two terminalsetc.

With the rapid growth of trafficand cyberspace ,telecommunication became an integral part of our life. Thefuture challenges are enormous as weanticipate rapid growth items of new services and number ofusers. Telecommunicationhas evaluated andgrowthat an explosive rate in recent yearsand will undoubtedly continue to doso.

The telecommunication links and switching were mainly designed for voice communication.With the appropriate attachments, they can be used to transmitdata.A modern society, thereforeneedsnewfacilities including very high bandwidthswitcheddata networks,andlarge communication satellites withsmall,cheapearthantennas.

PYTHON INTERNSHIP TRAINING PROGRAM

The industrial internship Training Program was organized by the Department of Basic sciences and humanities, TPCT'S college of Engineering, Osmanabad. It was arranged for all branches of F.Y.B.tech students. It was conducted by Fantasy Technologies in the period of 7th June to 2021 to 21/7/21 (45 Days) 90 Hrs. Founder of Fantasy technology are Mrs. Jyoti Tarange and trainer of this course were Mrs Prarthana Bakshi. This industrial internship Training Program was held under the guidance of Honorable principal Dr.Vikramsingh Mane and coordinator of this program were Prof. Usha Wadne Head of BSH Dept.

Introduction to Python Programming

Python is a widely used high-level, general-purpose, interpreted, dynamic programming language. Its design philosophy emphasizes code readability, and its syntax allows programmers to express concepts in fewer lines of code than would be possible in languages such as C++ or Java. The language provides constructs intended to enable clear programs on both a small and large scale. Python supports multiple programming paradigms, including object-oriented, imperative and functional programming or procedural styles. It features a dynamic type system and automatic memory management and has a large and comprehensive standard library. Python interpreters are available for installation on many operating systems, allowing Python code execution on a wide variety of systems.

Introduction to Python Programming

- Why do we need Python?
- Program structure in Python

Execution steps

- Interactive Shell
- Executable or script files.
- User Interface or IDE

Memory management and Garbage collections

- Object creation and deletion
- Object properties

INTRODUCTION

Radio Broadcasting was pioneered in India by the Madras Presidency Club Radio in 1924. The Club worked a broadcasting service for three years, but owing to financial difficulties gave it up in 1927. In the same year (1927) some enterprising businessmen in Bombay started the Indian Broadcasting Company with stations at Bombay and Calcutta. This company failed in 1930, in 1932 the Government of India took over broadcasting. A separate department known as Indian Broadcasting Service was opened. The Service was later designated 'All India Radio' (AIR) and was placed under a separate Ministry-the Ministry of Information and Broadcasting. The AIR is controlled by a Director General, who is assisted by several Deputy Directors and a Chief Engineer.

Broadcasting, in its significance, reach and impact, constitutes the most powerful medium of mass communication in India. Its importance, as a medium of information and education is particularly great in a vast and developing country like India where the reach of the printed word is not very wide or deep. While the total circulation of all the newspapers in India, including both English and Indian language papers, is around 8 million, there are, according to a recent estimate, nearly 400 million (out of a total population of 625 million) potential listeners to All India Radio. Broadcasting in India is a national service, developed and operated by the Government of India. All India Radio (also known as Akashvani) operates this service, over a network of broadcasting stations located all over the country.

As a national service, catering to the complex needs of a vast country, All India Radio seeks to represent in its national and regional

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

1.3.2(4) Internships

Class: IV BTech I Sem **List of Students** **AY: 2023-2024**

S. No	Registration Number	Name of the Student	Internship	Place	Duration (From-To)
1	320136414004	Doddi Prem Kumar	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
2	320136414038	Chavakula Kiran Babu	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
3	320136414052	Mohammed Hamid Raza	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
4	320136414057	Peruri Karthik Siddhardha	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
5	320136414064	Tirupathi Bhargav	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
6	320136414010	J Pavan Akash	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
7	320136414024	N S V Teja	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
8	320136414025	Olesi Deepthi	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
9	320136414016	Y Jyoti Priya	Energy Conservation and Management	HPCL, VISAKHAPATNAM	03-05-2023 to 10-07-2023
10	320136414011	K. Deepak Chand	Auxiliary Plant Generating Units of TPP	STEEL PLANT VISAKHAPATNAM	05-06-2023 to 01-07-2023
11	320136414021	M. Eesha Kumari	ELECTRIC LOCO SHED	VISAKHAPATNAM	12-06-2023 to 26-06-2023
12	320136414013	K. Yerrayyamma	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023
13	320136414027	P Kranthi Sri	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023
14	320136414033	V Keerthi	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023
15	320136414039	D Sai Ramya	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023
16	320136414042	G Mounika	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023
17	320136414044	G Harika	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023
18	320136414045	K Durga Bhavani	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023
19	320136414046	K Badhrinadh	132/33kV NAVAL WHARF SUB STATION	NAVAL DOCKYARD, VISKAHAPATNAM	12-06-2023 to 30-06-2023

INTERNSHIP OFFER LETTER

TO,

DATE: 05-06-2023

Mr. Laveti Sai Sampath
S/o Raja Rao
Door No.44-22-54,
Harinath towers,
Ramalayam street,
Rly new colony,
Visakhapatnam-530016

Dear Sai Sampath,

We are pleased to offer you an internship at our company in the Electrical maintenance department at our HPCL site. Your internship shall commence on **15th June 2023** and shall end on **01st July 2023**. The terms and conditions of your internship with the Company are set forth below:

1. Subject to your acceptance of the terms and conditions contained herein, your project and responsibilities during the Term will be determined by the supervisor assigned to you for the duration of the internship.

2. Your timings will be from 9AM TO 5PM, Monday to Friday. Please be sure to bring your documents with you on your first day to complete your profile.

3. The internship cannot be construed as an employment or an offer of employment with M/s S VENKATA RAO.

We have the right to cancel the internship. We look forward to having you on our team! If you have any questions, please feel free to reach out to us.

With Regards

For M/s S VENKATA RAO
